

Get Quality Standard Certifications with ease by using Softwin's workstation.

**At a Glance:**

Leading Manufacturing Industry want to implement Quality standard ISO/TS 16949, intending not only on document but actually in day to day activity it should be implement without duplication of work as well without any parallel/ dual system, i.e. a single integrated high-performance ERP system, should be capable to give all the results require by Quality standard inline with all the Department of organization.

Multi-site users should access accurate real-time data anytime from anywhere, avoid redundant data entry, and achieve other efficiencies and analyze the data.

Measurable performance results include a complete audit of ISO/ TS 16949 based on **Workstation** where all the records and trends are shown by workstation only.

Quality system (ISO TS 16949) integration by Softwin team takes organization & shop floor communication to a whole new level.

Like many other manufacturers that introduced some of the first Enterprise Resource Planning (ERP) systems years ago, Leading Manufacturer faced a dilemma. Its outdated DOS-based system needed another upgrade, and management had to decide whether it was worth the investment to throw more money at a system that was far less than state-of-the-art.

After a thorough evaluation, Leading Manufacturer selected ERP to replace the legacy system. The team selected **Workstation** for its leading-edge support and comprehensive capabilities of ERP, production & manufacturing execution systems, quality management, ISO/TS 16949 system, shop floor integration, and much more.

Also, because **Workstation** is delivered by complete customized project model, Leading Manufacturer avoids the adoption of other system. With Workstation, all the requirements are incorporated as a project Enhancements are made to the software on a regular basis at no additional cost.

“Workstation is the only true ERP which fulfill all the requirement of the organization inline Quality Standard - as in 'enterprise-wide' - solution.”

**Integrated System Replaces a Dozen Databases**

ERP seamlessly integrates data from every aspect of Leading Manufacturer’s operations, enabling the company to effectively and efficiently manage financials, bills of material, purchasing, receiving, inventory, manufacturing, quality, planning and scheduling, dispatch, engineering change tracking, subcontracting, document control, production management, human resources, onetime efficiency and analysis trends , and more. System users from all of Leading Manufacturer’s departments and facilities access accurate, real-time data and pull reports anytime, from anywhere.

ERP replaced Leading Manufacturer’s antiquated ERP system as well as number of MS-Excel and MS-Word document files that hadn’t even talked with each other before, and it eliminated the need for management to track and update a lot of redundant

data.

"We've discovered that **Workstation** is the only true ERP - as in 'enterprise-wide' - solution," noted Leading Manufacturer's Director Operations. "Everybody and their brother offer financials, but **Workstation** is the only system that encompasses everything, including areas that we didn't even have systems for but tracked through manual spreadsheets during audits."

### **Quality system Integration is a Game Changer**

Thanks to Workstation Systems; all of Leading Manufacturer's department and processes integrated that enable seamless, real-time communication through ERP. "This integration in Workstation Plotter tool enables the system to manage large volumes of data and provide detailed shop-floor information with graphical representation," said MR of the organization. "Leading Manufacturer's operators have everything they need to meet their rigorous quality standards, all right at their fingertips."

"Integrating Quality System with Workstation allows all of our process to communicate with each other," said Director Operations. "With the ISO integration, we automatically report production at a highly detailed level, increase machine uptime, and ensure a consistently high-quality part output. It completely changes the way we do business."

Team@Softwin implemented the ISO integration 100 percent remotely, without any business disruption to Leading Manufacturer. This allowed them to optimize their time and resources.

### **Shop Floor Controls Lead to Customer Satisfaction**

The keys to Leading Manufacturer's shop floor productivity are the quality check sheets that must be completed for every job. ERP keep available the details on the check sheets, ensuring they are carefully reviewed for each job. For every production; production entry is must, for every rejection and downtime system keeps checks, and give the real picture of organization's production with fact figure OEE.

Noted, Technical Director , "Leading Manufacturer customers are delighted with this function, as they can review the number of quality checks and be assured that any part / batch that does not meet quality specifications will not be shipped."

The combination of the check sheets and the overall Quality integration lets Leading Manufacturer achieve high levels of customer satisfaction, and awarded by number of customer for his 0 (Zero) PPM performance

"Our customers are assured that all production data can be tracked, indexed and searched," said Technical Director, "and thanks to our Quality system integration, they know we're doing exactly what we say we will. It's a highly reliable system, and it makes them feel confident in us."

### **Efficiencies Bring Measurable Improvements**

**Workstation** ERP enables Leading Manufacturer to achieve measurable improvements in operations. "With on-time inventory tracking, for instance, we reduce raw materials and work-in-process inventory costs, and we've improved our inventory turns by 50 percent," explained Director Operations. "Our overall productivity has increased, and we are beating the OEE to which we track our performance, in every single category."

"Overall, we do the same amount of business we did before the economic downturn, and we're doing it with half the number of resources. **Workstation** is definitely a big part of that."

### **About Workstation :**

**Workstation** is the Manufacturing ERP and could be customized as per customers need, delivering industry-leading ERP and manufacturing automation to more than 200 companies across industries. Workstation pioneered solutions for the shop floor, connecting suppliers, machines, people, systems and customers align to Quality slandered with capabilities that are easy to configure, deliver continuous innovation, and reduce IT costs.
